

SYSTEM INTEGRATION  
YOUR BUSINESS IN TOTAL HARMONY.

▣▣ It's all about having an auditable process in place. Laurus was able to help us gain the system flexibility as well as efficiency and capacity we needed to better compete in our marketplace. ▣▣

## BLENDING THE LINES AND ANGLES OF SYSTEM ARCHITECTURE TO MAXIMIZE YOUR BUSINESS PERFORMANCE.

Today, the biggest challenges for System Integration in a company include improving efficiencies and reducing costs. In other words, doing more with less.

Effective messaging and collaboration were keys to improving our customer service, increasing our productivity, and bringing our new products to market quickly. The Laurus team developed an IT strategy that met all of our needs, in terms of performance as well as practicality.

The goal of the Laurus systems integration team is simple to define, but far more difficult to achieve. At Laurus, systems integration means empowering a company to reach its full potential by optimizing the relationship between its system applications and technologies.

The Laurus SI team starts with assessment, using an engineering focus to solve the problem correctly, or to craft a technology strategy that brings a competitive advantage to the marketplace.

By understanding the client's IT vision and strategy and becoming more highly aligned with the client's specific needs, Laurus can better determine the most effective solution...achieve total harmony...empower your business.

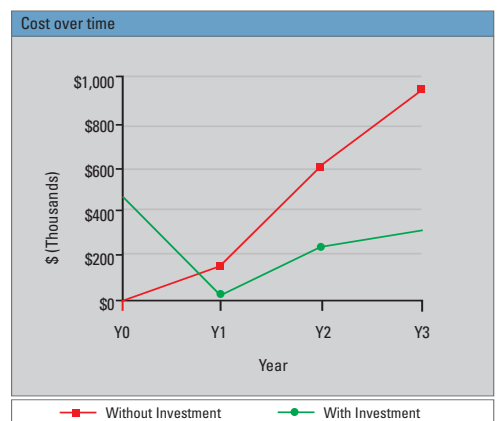

### EXCELLENCE THROUGH PARTNERSHIP

In business as in life, organizations are judged by "the companies they keep." Laurus Technologies is committed to developing optimal business solutions by working with only the most accomplished and respected technology partners in the world. To view

some of the partners we trust most when working to meet our clients' needs, ask us, or visit our website, [www.laurustech.com](http://www.laurustech.com).

### REDUCING TCO THROUGH ENHANCED SYSTEM SOLUTIONS

Optimal system integration can significantly reduce a company's Total Cost of Ownership (TCO), as shown in the chart below, by reducing floor space requirements, savings on power and cooling costs, and lower maintenance costs.

## ENGINEERING TOTAL SOLUTIONS.

With the vast experience of the SI team, Laurus uses its knowledge in a variety of critical areas to best serve its clients' needs.

### **BUSINESS CONTINUITY: ROUND-THE-CLOCK PEACE OF MIND**

The assurance of knowing your business will continue to operate should something catastrophic occur to your systems or facilities is a requirement not an option in today's market. Such confidence is the result of proper needs assessment combined with an appropriate plan to keep business on-line, reduce downtime and recover systems and data wherever and whenever needed.

Because the need for continuity runs across multiple sources and platforms, clients choose Laurus Technologies. Typical IT vendors don't have the depth of Laurus' experience. Our seasoned engineers offer thorough knowledge across platforms and superior guidance in a wide variety of business continuity issues, including:

- Backup Recovery and Archiving
- Virtual Tape Libraries
- Data Replication
- Infrastructure Services
- Infrastructure Availability Assessment

- Operational Assessments
- Data Center Readiness Assessment
- Procurement and Technology Management
- Storage Virtualization
- Enterprise Storage
- Tiered Storage
- Network Area Storage (NAS)
- Storage Area Networks (SAN)
- Data Center Readiness Assessment
- High Availability (HA)

### **DATA CENTER CONSOLIDATION THAT REDUCES COSTS AND COMPLEXITY**

The experts at Laurus Technologies understand the necessity of architecting enterprise systems to build a distinct competitive advantage. They accomplish this with the leading enterprise disk/tape storage, mid-range storage and system solutions.

Companies turn to Laurus to architect their systems for maximum utilization required to meet their business needs. Through the ability to engineer unique solutions for customers, Laurus is able

to reduce cost and complexity in the datacenter. The results are solutions that not only meet today's needs, but also address future growth.

Through TCO studies and assessments, Laurus can architect the best and most cost effective solution for your business, whether dealing with multi-tier storage, business continuity, or consolidation and virtualization. Our expertise includes:

- Performance Tuning
- Server Consolidation
- Storage Consolidation
- Capacity Planning
- Virtualization
- Clustering
- Provisioning
- Storage Consolidation Assessments
- Server Integration and Implementation

## SOLVING SECURITY AND COMPLIANCE CHALLENGES

Whether your organization demands a plan for securing data at rest, intrusion detection, total

network security or an overall security data plan, Laurus Technologies has the right solutions.

Companies choose Laurus because its expertise reaches across the total infrastructure and architecture. Broad focus and understanding allows Laurus to deliver a more comprehensive, more custom-engineered solution to each of its clients.

Clients turn to Laurus for guidance and planning in all areas of security and compliance, including:

- Access Control
- Content
- Data Loss Protection
- Directory Services
- Encryption
- Messaging

▣▣ Laurus took the time to understand our specific systems objectives. That made all the difference in getting it right from the start. ▣▣

## YOUR BUSINESS. EMPOWERED TO SUCCEED.

When a company partners with Laurus Technologies, it is establishing a trusted relationship with a firm that cares, understands technology, follows focused methodologies and correctly applies the tools and techniques needed to optimize productivity and ensure success.

Our mission is to provide every client with an IT partner that it can rely on to help maximize the company's true business potential through the optimal infrastructure. In other words, our primary concern is...Your business. Empowered.
